PROFESSIONAL SUMMARY

Junior QA Engineer with a background in web development and hands-on experience in manual testing, test case design, bug reporting, API testing, SQL/database validation, and basic UI test automation with Playwright and JavaScript. Experienced in functional, regression, smoke, exploratory, positive, and negative testing. Hands-on experience with REST API validation using Postman, PostgreSQL database validation, and automated UI testing using Playwright. Technical background in HTML, CSS, JavaScript, Git, and GitHub supports effective defect investigation and communication with development teams.

SKILLS

Software Testing: Manual Testing, Functional Testing, Regression Testing, Smoke Testing, Exploratory Testing, Positive Testing, Negative Testing, Test Case Design, Bug Reporting
Test Design Techniques: Boundary Value Analysis (BVA), Equivalence Partitioning
API Testing: Postman, REST API Testing, HTTP Methods, HTTP Status Codes, JSON, Bearer Token Authentication
Test Automation: Playwright, JavaScript, UI Test Automation
Database: SQL, PostgreSQL, pgAdmin, Database Validation
Tools & Version Control: Jira, Git, GitHub, Visual Studio Code
Technical Background: HTML, CSS, JavaScript, React.js, Node.js
Methodologies: Agile, Scrum

PROJECTS

End-to-End QA Case Study | GitHub

- Created an end-to-end QA case study covering registration, login, product search, shopping cart, and checkout flows.
- Documented and evaluated 28 manual test cases including positive, negative, regression, and exploratory scenarios.
- Combined manual testing with selected API and SQL/database validation activities.
- Identified and documented functional defects including severity, priority, expected result, and actual result.

UI Automation with Playwright | GitHub

- Automated login, product search, product detail, and shopping cart scenarios using Playwright and JavaScript.
- Created positive and negative UI automation scenarios using Playwright assertions.
- Used getByRole, getByLabel, getByText, and data-test locator strategies.
- Investigated and resolved locator-related automation failures during test execution.

API Testing with Postman | GitHub

- Tested REST API endpoints using GET, POST, PUT, and DELETE requests.
- Validated HTTP status codes, JSON response data, authentication, and negative API scenarios.
- Used Bearer Token authentication and Postman test scripts for response assertions.
- Worked with collection variables and dynamic resource IDs.

SQL for QA / Database Validation | GitHub

- Created and tested a PostgreSQL sample database for QA validation exercises.
- Used SELECT, WHERE, ORDER BY, COUNT, GROUP BY, HAVING, JOIN, and LEFT JOIN queries.
- Performed QA-focused checks for duplicate records, NULL values, invalid quantities, negative stock, and relational integrity.

Manual Testing – E-Commerce Application | GitHub

- Designed and executed functional, positive, negative, exploratory, and regression test scenarios.
- Created a test plan, test scenarios, test cases, and structured bug reports.
- Applied Boundary Value Analysis and Equivalence Partitioning techniques.

EXPERIENCE

Freelancer, Fullstack Developer | Remote **Sep 2025 – Present**

- Developed and maintained responsive web applications based on project requirements.
- Performed functional validation across frontend and backend user flows. .
- Identified, investigated, and resolved application defects using browser developer tools. .
- Performed pre-deployment checks and regression validation after application changes.
- Used Git and GitHub for version control and project collaboration.

EDUCATION

Anadolu University | Computer Programming | Associate Degree **Sep 2025 – Present**

ADDITIONAL INFORMATION

Certificates:
Udemy - Software Testing Training | Oct 2026
BTK Akademi - Versiyon Kontrolleri: Git ve GitHub | Dec 2025

Certification Preparation:

- **ISTQB Certified Tester Foundation Level (CTFL) – In Preparation**

Languages: Turkish (Native), English (Intermediate)
